How China Changed the World

Grade 4 is working hard on their key assignment for Quarter 2. They are writing their myths that explain how their Chinese invention came to be. Moreover, they are creating a trading stall for their invention. The students have experienced how supply and demand work through participating in an auction. They are earning classroom cash for their classroom jobs.

In Literacy, the students are publishing their fictional narratives, and have compared and contrasted myths about natural phenomenon to scientific explanations.

In math, we are learning various division strategies for multi-digit problems.
